

OptiColour 200

The New Colour Negative Sheet Film

OptiColour 200 is a modern ISO 200 colour negative film, now available in large format (4×5, 5×7 and 8×10). It offers natural colour reproduction, balanced contrast and exceptionally pleasing skin tones, based on the Wolfen NC200 emulsion.

In large format, the film reveals its full potential: extremely fine grain, outstanding detail and a smooth tonal rendering that is ideal for high-resolution work and fine art applications.

Key Features

- Natural, well-balanced colours
- Strong greens and reds
- Exceptionally fine grain in large format
- Outstanding detail and tonal gradation
- Excellent skin tone rendition
